

Simply Unique Single Seat

Unique SSV Manually Operated/Manually Regulating

Concept

The Unique Single Seat valve meets the highest demands of your process in terms of hygiene and safety. It is built on a well-proven platform, from an installed base of more than one million valves.

Working principle

The manual regulated Unique Single Seat Valve is a regulating valve used for manual control of pressure and flow. The valves permit gradual opening and the few and simple moving parts result in very reliable valves easy to dismantle. The plug can be fixed in the adjusted position with a lock screw. The valve is based on the modular platform of the Unique Single Seat Valve.

Standard Design

The manual operated valve can easily be converted to a pneumatic operated valve by replacing the crank mechanism with an Unique Single Seat Valve actuator. The other parts are identical.

TECHNICAL DATA

Temperature

Temperature range: -10°C to +140°C (EPDM)

Pressure

Max product pressure: 1000 kPa (10 bar)

Min. product pressure: Full vacuum

Pressure drop/capacity diagrams:

The same as Unique Single Seat Valve.

Valve Body Combinations

PHYSICAL DATA

Materials

Product wetted steel parts: 1.4404 (316L)

Other steel parts 1.4301 (304)

External surface finish Semi-bright (blasted)

Internal surface finish Bright (polished), Ra < 0.8 µm

Other product wetted seals EPDM

Options

- A. Male parts or clamp liners in accordance with required standard.
- B. Product wetted seals in HNBR or FPM.
- C. Plug seal HNBR, FPM or TR2 plug (floating PTFE design - only for Manual Operated Valve).
- D. External surface finish bright.

Note

For further details, see instruction ESE00307.

Other valves in the same basic design

The Unique SSV valve range includes several purpose built valves. Below listed are some of the valve models available, though please use the Alfa Laval computer aided selection tool (CAS) for full access to all models and options.

- Standard valve.
- Reverse acting valve.
- Aseptic valve.
- Long Stroke valve.
- Tank Outlet valve.

The actuator comes with a 5 years warranty

Kv-Factors

Valve size	Kv
38mm/DN40	14*/44
51mm/DN50	75
63.5mm/DN65	113
76.1mm/DN80	171
101.6mm/DN100	250

* optional

Kv = m³/h at a pressure drop of 1 bar.

For other pressure drops than 1 bar the flow can be calculated with the following formula:

$$Q = Kv \times \sqrt{\Delta p}$$

Where

Q = Flow in m³/h.

Kv = See above.

Δp = Pressure drop in bar over the valve.

Example:

Plug Kv 75

Q to be calculated at $\Delta p = 2$ bar:

$$Q = 75 \times \sqrt{2} = 106 \text{ m}^3/\text{h}$$

or at 50% stroke:

$$Q = 0.5 \times 75 \times \sqrt{2} = 53 \text{ m}^3/\text{h}$$

Pressure drop/capacity diagram:

The plugs have linear characteristics. This means that a certain amount of throttling, by reducing the stroke, results in a proportional reduction of the flow if the pressure drop remains unchanged.

Fig. 3. The flow in % of the total flow at a pressure drop of 1 bar.
